

Dating App

OVERVIEW

Dating Application is the Next Big Mobile Dating app which is targeted to be a tool for long-term relationship establishment. The initial app version has already gained 4.5-star rating on Play Store. Comparing to other dating apps, this application has more tools for personality traits identification and built-in clever matching system. The entirely new way to find new matches - is a question explorer. The questions can be chosen individually by user. The answer may also be filtered by quality, interest, dater criteria, etc.

FEATURES
